

Duct Bank Spacer System

The Alva *Duct Bank Spacer System* is built from HDPE to ensure reliable performance in all jobsite conditions.

- Ergonomic design with smooth corners enhances safety and handling.
- Engineered for long-lasting durability in demanding environments.
- Spacer sheets are tailored to fit a wide range of project specifications.
- Helps reduce trench labor and minimize jobsite hazards.
- Streamlines setup to save valuable time on-site.

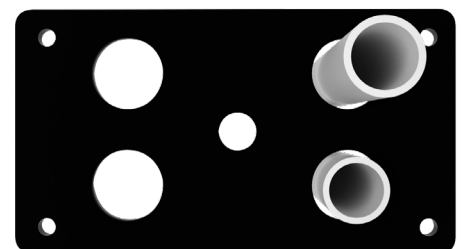

<i>Duct Bank Spacer System</i>		
<i>Part No.</i>	<i>Description</i>	<i>Size</i>
AD0012	Alva Ductbank System Spacer 1/2" thickness	1/2"
AD0034	Alva Ductbank System Spacer 3/4" thickness	3/4"
AD0038	Alva Ductbank System Spacer 3/8" thickness	3/8"

How to get a quote:

1. Please send us your approved design or your Project Electrical Site Plan with the Electrical Details Plan.
2. We will generate and send a digital template design for the customer's approval.
3. Once the design and quantities are approved, we will issue the quote for the complete project.

Quote times and lead times may change based on complexity of design and quantity of spacers.

Our Duct Bank Spacers are proudly manufactured in the US.
