

PVC Conduit SCH.40 Sweeps

Plain & Bell End | 90° 45° 30° 22.5°

A PVC conduit sweep is a type of curved electrical conduit made from polyvinyl chloride (PVC), compound according to the specifications of the UL 651 and ASTM D 1784 STANDARD.

Sweeps are essential fittings that change the direction of electrical conduit runs and are designed to preserve wiring integrity for smooth wire pulling.

- Rated for use with 90-degree C wire.
- Sunlight resistant rated. Complies to ANSI/UL 651 file number E546229 and NEMA TC2.
- Constructed from SCH.40 PVC for added strength and durability.
- Designed for both outdoor and indoor applications.
- Ideal for aboveground and underground installations.
- NFPA 70 National Electrical Code.

Specifications & References

ANSI/UL 651 – file number E546229.
NFPA 70 National Electrical Code.
NEMA TC2.

Installation & Storage

PVC Conduit may be buried directly in the earth. It can be used in walls, floors, and ceilings, and may be encased in concrete. It can be installed in areas exposed to direct sunlight (NEC 352).

SCH 40.PVC Conduit can be acceptable where not subject to physical damage. SCH.40 PVC Conduit shall be listed to UL 651 for use outdoors and exposed to direct sunlight.

Please always check your local codes for any exceptions to the National Electric Code.
