

PVC Conduit fittings

Alva molded PVC conduit fittings are engineered for dependable performance in electrical systems. Designed for easy installation and long-term durability, our fittings ensure secure connections and smooth transitions in both residential and commercial applications.

Applications

Electrical conduit systems, surface and wall-mounted installations, termination points, commercial and industrial wiring systems and conduit-to-box transitions.

Key Features:

- Molded from high-strength, weather resistant PVC
- Compatible with SCH. 40 and SCH. 80 conduit
- Ideal for indoor and outdoor use
- ETL Listed for safety and regulatory compliance

PVC Conduit Center stop coupling

Sizes: 1/2" thru 6"

Used to join two sections of PVC conduit while maintaining precise alignment and depth control.

PVC Conduit Bell end

Sizes: 1/2" thru 6"

Designed to provide a smooth, flared entry point for conduit runs.

PVC Conduit Male adapter

Sizes: 1/2" thru 6"

Male threaded end for secure box or enclosure connection

PVC Conduit Female adapter

Sizes: 1/2" thru 6"

Used to connect PVC conduit to threaded male fittings, such as electrical boxes.

PVC Conduit End cap

Sizes: 1/2" thru 6"

Used to seal off the open end of a conduit run, protecting electrical systems from environmental exposure.

PVC Conduit Box adapter

Sizes: 1/2" thru 6"

Designed to connect PVC conduit to electrical boxes or enclosures, providing a secure and flush transition point.

PVC Conduit Reducer bushing

Sizes: 3/4" x 1/2" thru 4" x 3-1/2"

Used to transition between different conduit sizes, allowing a larger conduit to connect securely to a smaller one.

PVC Conduit Pipe clamps

Sizes: 1/2" thru 4"

Used to secure conduit runs to walls, ceilings, or other surfaces, keeping them organized and properly supported.
